

Your Partners For Success

“ We chose PVI Systems because we trust them. They are truly customer driven at all levels, from developing a working concept, to delivering and supporting extraordinary products and services. ”

PROVIDING A FULL ARRAY OF
ENGINEERING AND TECHNICAL
SOLUTIONS TO COMPANIES WORLDWIDE

Services

- ATE Test Solutions
- Automated Quality Control
- Data Acquisition
- Machine Vision
- Electromechanical Design
- Project Management

Products

- Fiber QA™
- Fiber QA™ - AVIT
- Fiber QA™ - μ AVIT
- Backplane Pin Inspection System
- Dual Arm Auto Sampler

Benefits

- Improve Your Processes, Obtain Higher Quality, Lower Costs
- Access to PVI Systems' Award Winning Engineers and Project Managers
- Complete Turn-Key Solutions
- World Class Support

PVI Systems , a closer look.....

Get to know us

The Beginning

PVI Systems was founded in 1999 by three engineers with experience and a vision. With every carefully executed project, PVI Systems earned another satisfied customer. From large commercial and military contracts to smaller companies and R&D labs, we maintained, and continue to maintain a healthy growth trend.

Today

Two buildings later, a larger staff, and a customer base that has grown from regional to global, we are still in touch with our founding principles.

We are customer focused, whether we are consulting, developing software or hardware solutions, or installing and supporting some of our world-class products that have been developed through the years.

We continue to invest in our company and staff by developing unique skills to help us meet the combined challenge of quality engineering and aggressive customer timelines.

The Future

PVI Systems will continue to provide the services that we have become famous for. Our future is you, our customer, and we know it. The solutions you need to make you competitive and successful will be the key to our success.

We are also looking forward to continually introducing more cutting edge products. Our wide range of experience in so many industries gives us keen insight into what tomorrow's challenges will be, and what products will meet those challenges. When we look to our future, we have your future in mind.

Experience Overview

Software & Hardware Development and Consulting

LabVIEW& LabWindows/CVI
Visual Basic - Component Works
C and C++
SCXI, DAQ Boards
GPIB, RS-232/485, VXI, LXI

System Level Design

Software Architecture Development
Database Management
Database design

Test, Measurement and Control

Virtual Instrument Development
Durability Testing
PC-Based Data Acquisition (DAQ)
PC-Based Machine Vision
Real-Time DAQ and Control Systems using LVRT

Automated Test Equipment (ATE)

Full Turnkey Test Systems
Including Fixtures, Interface Circuitry
NI TestStand test executive
PXI, VXI, or GenRad based systems

Industrial Automation

Assembly Line Automation
Preventative Maintenance Systems
PAC, HMI Development, cRIO, Field Point

Training

LabVIEW Basics, Advanced, DAQ Courses
LabWindows/CVI
On-site Courses Available
Custom Courses Available
